

# EUCAIM

Cancer Image Europe is pioneering a pan-European federated infrastructure for cancer images, fuelling AI innovations. Our mission is to build a pan-European digital federated infrastructure of cancer-related images, which will be used for the development of AI tools toward Precision Medicine. We hope that this infrastructure will provide the means to develop AI tools that will be able to enhance the (cancer) diagnosis procedure, treatment and the identification of the need for predictive medicine benefiting patients across Europe.

Cancer Image Europe provides a robust, trustworthy platform for researchers, clinicians, and innovators to access diverse cancer images, enabling the benchmarking, testing, and piloting of AI-driven technologies. By connecting high-quality cancer image data and AI experts, Cancer Image Europe facilitates collaboration and accelerates the development of cutting-edge solutions for cancer diagnosis and treatment.
