

2018-10 - Job opportunity

Undergraduate position on Data Science

CLOSED	Deadline: 29 Oct 2018
Contact: aloga@ifca.unican.es	

There is an open undergraduate position at [IFCA](#) in order to work with us towards a PhD. This is a multidisciplinary position shared with the [Meteorology Group](#) for highly motivated MSc graduates (this is a competitive call).

We offer a 4-year contract under the FPI programme of the [Spanish Ministry of Science, Innovation and Universities](#). The complete call text and online submission procedure can be found under [this link](#). **Applications close on 29 Oct 2018.**

Our project is listed under the "[Listado proyectos Severo Ochoa y María de Maeztu.pdf](#)" file. The details are the following:

- Reference: MDM-2017-0765-18-2.
- Title: Data Science techniques applied to Big Data in Open Science.
- Description: This thesis project will focus on the application of data science techniques (machine learning and deep learning among others) to analyze Big Data volumes in the areas of meteorology, computer security or fraud detection. This is a multidisciplinary work involving the implementation and exploitation of Big Data tools to efficiently analyze the data volumes and the development of Open Science services in the context of the European Open Science Cloud and the related EU projects. The fellow will interact with international collaborations and projects where the IFCA's Meteorology and Advanced Computing and e-Science Groups are involved.

If you are interested, please send an email to the contact address listed above.
