

EUFORIA - EU For ITER Applications

EUFORIA (EU Fusion FOR Iter Applications) is a project funded by European Union under the Seventh Framework Programme (**FP7**) which will provide a comprehensive framework and infrastructure for core and edge transport and turbulence simulation, linking grid and High Performance Computing (**HPC**), to the fusion modelling community.

Start: 01/01/2018

End: 31/12/2010

Closed project
