

# INDIGO - DataCloud

INDIGO-DataCloud (INtegrating Distributed data Infrastructures for Global Exploitation. Grant Agreement number RIA 653549).

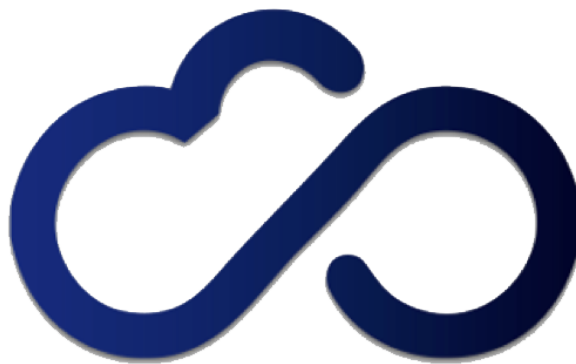

The INDIGO-DataCloud project (INDIGO for short) aims at developing a data/computing platform targeted at scientific communities, deployable on multiple hardware, and provisioned over hybrid (private or public) e-infrastructures. This platform will be built by leading European developers, resource providers, e-infrastructures and scientific communities in order to ensure its successful exploitation and sustainability.

Start: 01/04/2015

End: 30/09/2017

Closed project
