ISO 27001:2017

ISO 27001:2017 - Information Security Management System

The Advanced Computing service of IFCA is certificated in ISO/IEC 27001 standard, with the purpose of improving information security management (minimizing risks and preserving confidentiality, integrity, and availability of information) and obtaining a greater impact in the calls for computing projects at national, European and international level in which the institute participates.
