AARC-2

The **Authentication and Authorisation for Research and Collaboration (AARC)** initiative was first launched in May 2015 to address the increased need for federated access and for authentication and authorisation mechanisms by research and e-infrastructures.

Running for two years, AARC was funded by the European Union's Horizon 2020 research and innovation programme under Grant Agreement 653965.

A second phase of the project (**AARC2**) started in May 2017 to continue to develop and pilot an integrated cross-discipline authentication and authorisation framework, building on existing authentication and authorisation infrastructures (AAIs).

AARC2 is funded by the European Union's Horizon 2020 research and innovation programme under Grant Agreement 730941.
