

2021 - Distributed computing open positions

CLOSED

Deadline: open until all positions are covered

Contact: alvaro.lopez@csic.es

The [Advanced Computing and e-Science](#) group at the [Institute of Physics of Cantabria \(IFCA\)](#), Santander (Spain), is seeking for motivated full-time experts in computing with a background in the deployment and operation of distributed computing tools and infrastructures. For each of the positions we offer a **1.5-year contract from August-September 2021 up to December 31st 2022**. The **gross annual salary will start at 30000€, according to the CSIC scales and the candidate qualifications**. The contract includes all the benefits of the Spanish Public Health and Social Security system. Applications are welcome until the positions are filled.

Starting date: preferably **September 2021**.

2 positions with background in distributed computing.

- These positions will deal with the operations, development and integration of the distributed computing and storage platform offered by the project, following a Cloud computing model, working with highly distributed environments.
- The positions to be carried out at **IFCA**.
- Required skills:
 - Proficiency working with Linux environments.
 - Experience working with distributed systems, especially Cloud infrastructures, including data analytics tools for big data processing.
 - Knowledge on serverless infrastructures and other novel computing models.
 - Knowledge on database systems (SQL, NoSQL, PostgreSQL).
 - A master's degree or other graduate degree in computer science or a related field.

It is necessary to have team working skills, self-motivation, excellent organizational skills with attention to detail and accuracy.

For further enquiries and to submit the applications candidates must use the following email alvaro.lopez@csic.es.

The required information to apply to these positions is:

- Curriculum vitae with details on studies, background and previous experience.
